

# ALICE IN THE CROSSCURRENTS

2024  
UPDATE

## AN UPDATE ON FINANCIAL HARDSHIP IN ARKANSAS

In 2022, financial hardship in Arkansas continued to be shaped by the conflicting economic forces of the pandemic, and remained substantially undercounted by official measures.

These powerful crosscurrents – COVID-19, inflation, wage growth, and the expansion and expiration of [pandemic public assistance](#) – impacted how many Arkansas households were below the [ALICE Threshold of Financial Survival](#).

Between 2021 and 2022, the number of Arkansas households in poverty increased by 6,141 (remaining at 16% of all households). During the same period, the number of ALICE households increased by 4,813 (remaining at 31% of all households), continuing a more than decade-long trend in the growth of this population. **In 2022, of the 1,201,499 households in Arkansas, 562,879 – 47% – were below the ALICE Threshold.**

With the latest data from the [American Community Survey](#) (2022), the [U.S. Census Bureau's Household Pulse Survey](#) (2023), and the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED) (2022), this Update highlights the conflicting forces that continue to present opportunities for, and barriers to, financial stability in Arkansas.

Total Households in Arkansas = 1.2 Million

## KEY TERMS

- **ALICE:** Asset Limited, Income Constrained, Employed – households that earn above the Federal Poverty Level (FPL) but cannot afford the basic cost of living in their county. Despite struggling to make ends meet, ALICE households often do not qualify for public assistance.
- **ALICE Household Survival Budget:** Reflects the minimum costs of household necessities in Arkansas (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for different counties and household types
- **ALICE Threshold of Financial Survival:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties
- **Below ALICE Threshold:** Includes households in poverty and ALICE households combined
- **ALICE Essentials Index:** A measure of the average change over time in the costs of essential goods and services

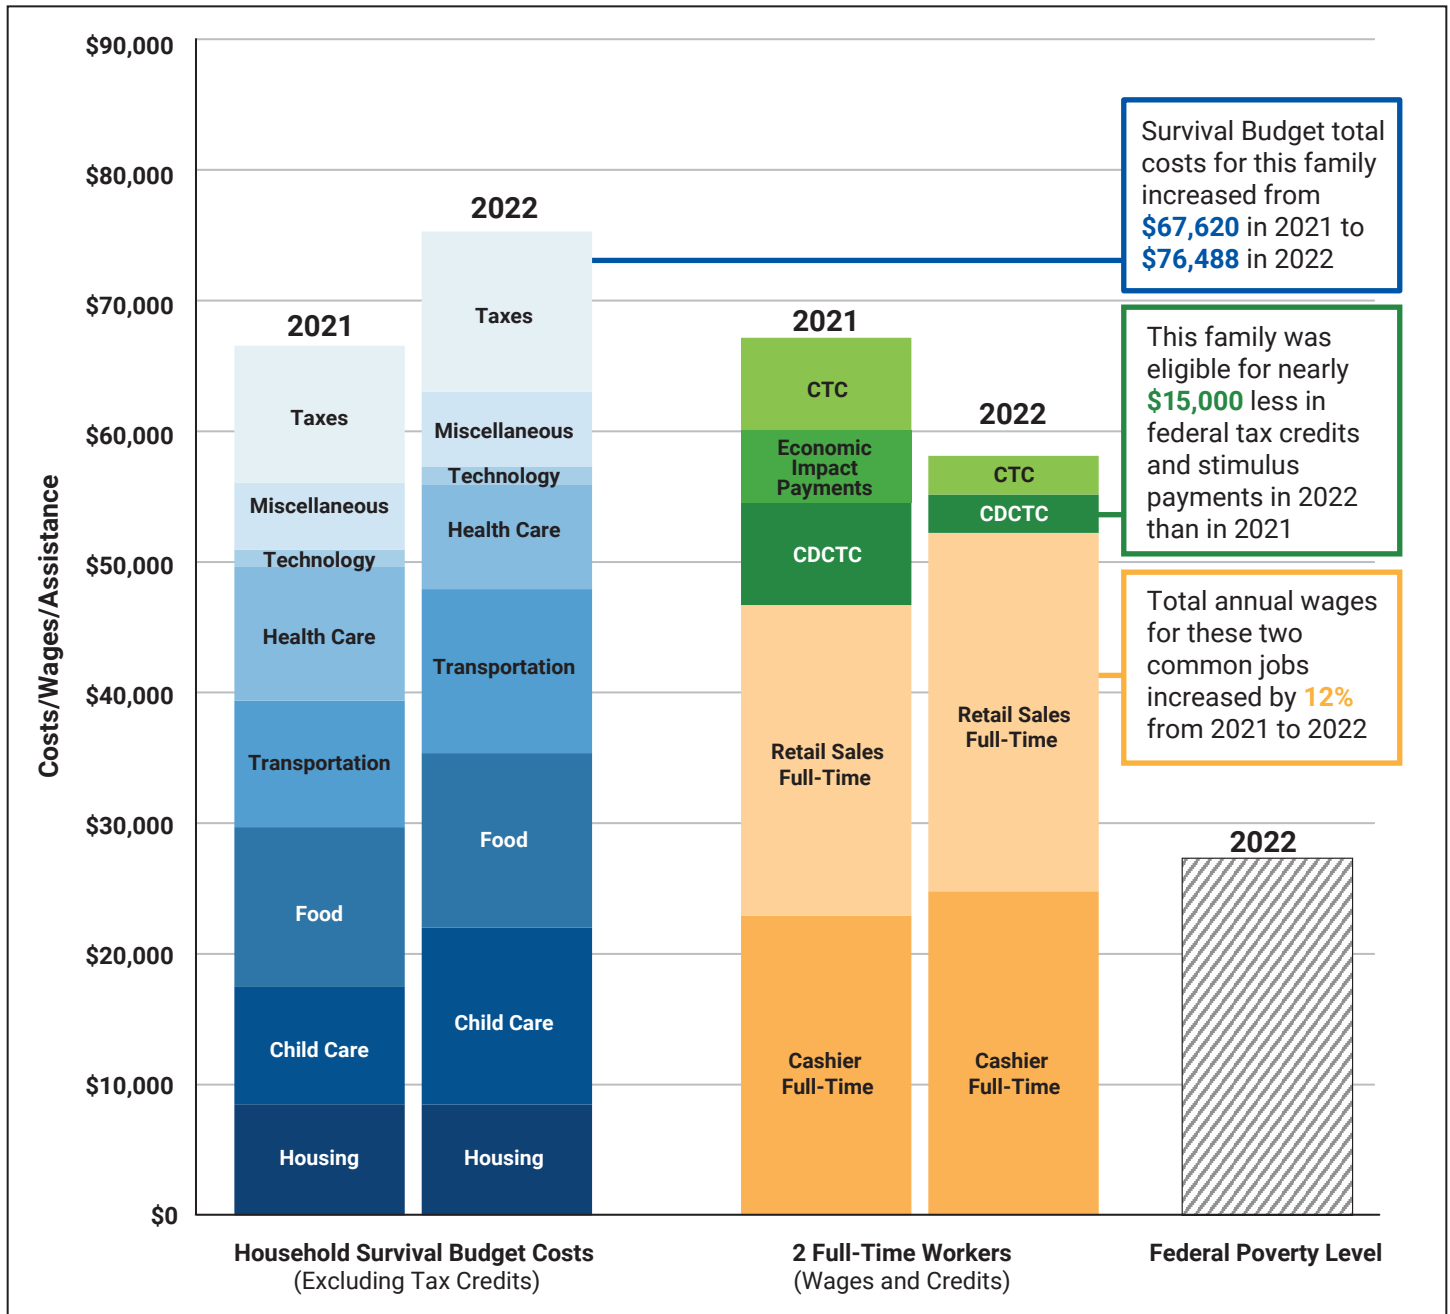

# HOUSEHOLD COSTS, PUBLIC ASSISTANCE, AND WAGES

Financial hardship among Arkansas households shifted from 2021 to 2022 based primarily on three factors:

- **Costs:** From 2021 to 2022, the ALICE Household Survival Budget for a single adult in Arkansas increased from \$23,796 to \$24,960, well above the FPL of \$13,590. For a family of four with an infant and a preschooler, the budget (including tax credits) increased from \$54,948 to \$71,052, well above the FPL of \$27,750. Excluding tax credits, costs for a family of four totaled \$76,488 in 2022, up from \$67,620 in 2021. (More data on inflation is available in the [ALICE Essentials Index](#) June 2024 Update.)
- **Public assistance:** Pandemic assistance had the most pronounced effects on families with children. The Economic Impact Payments and the expansions of the Child Tax Credit (CTC) and the Child and Dependent Care Tax Credit (CDCTC) helped many ALICE families through 2021. But this assistance was substantially reduced when the [2021 American Rescue Plan](#) expired, stimulus payments ended, and tax credits reverted to 2020 levels. In 2022, a family of four with an infant and a preschooler in Arkansas was eligible for approximately \$15,000 less in maximum federal tax credits and stimulus payments than in 2021.
- **Wages:** As pandemic assistance wound down, wages increased for most low-wage jobs. For example, median retail sales wages in Arkansas increased from \$11.61 per hour in 2021 to \$13.39 per hour in 2022.

# Comparison of Costs, Public Assistance, and Wages, Family of Four, Arkansas, 2021 and 2022

Note: CTC = Child Tax Credit, CDCTC = Child and Dependent Care Tax Credit. Full-time income is calculated based on 40 hours per week.

Sources: ALICE Threshold, 2021 and 2022; Bureau of Labor Statistics—Occupational Employment Statistics, 2021 and 2022; Internal Revenue Service, tax credits—CTC, CDCTC, EITC, 2021 and 2022; U.S. Department of the Treasury, 2022 and 2023.

See page 13 for Household Survival Budget sources and visit [UnitedForALICE.org/Household-Budgets/Arkansas](https://UnitedForALICE.org/Household-Budgets/Arkansas) to see the Household Survival Budget for all counties and for any household composition.

Across the country, between 2019 and 2022, [wages for the lowest-paid jobs increased](#) at a faster rate than at any point since 1979. This was in part due to a [tighter labor market](#) in which workers reevaluated their employment situation in the wake of the pandemic and inflation, and employers had to offer more competitive wages to attract and retain them. Minimum wage increases in some states also contributed to this effect. In Arkansas, the minimum wage increased from \$9.25 per hour in 2019 to \$11.00 per hour in 2022, while the federal minimum wage remained at \$7.25 per hour.

While wage increases helped fill the gap when pandemic assistance ended, they were not enough to make up for years of falling behind. In 2022, of the 20 most common occupations in Arkansas as reported by the Bureau of Labor Statistics (BLS), 70% still paid less than \$20 per hour. And of the workers in these 20 most common occupations, 31% were below the ALICE Threshold in 2022. Occupations with the largest share of ALICE workers included waiters/waitresses, nursing assistants, cashiers, teaching assistants, and fast food/counter workers.

## Labor Characteristics of Most Common Occupations, Arkansas, 2019–2022

Most Common Occupations	Total Employment, 2022 (BLS)	Percent of Workers Below ALICE Threshold, 2022 (ACS PUMS)	Median Hourly Wage, 2022 (BLS)	Percent Change in Wage, 2019–2022 (BLS)
Driver/Sales Workers and Truck Drivers	44,430	32%	\$17.48	-1%
Fast Food and Counter Workers	36,520	43%	\$12.26	28%
Cashiers	32,840	47%	\$12.11	20%
General and Operations Managers	32,300	8%	\$30.41	-11%
Retail Salespersons	31,290	38%	\$13.39	22%
Stockers and Order Fillers	28,930	34%	\$14.30	20%
Laborers and Movers, Hand	28,920	40%	\$15.45	24%
Registered Nurses	28,490	11%	\$30.83	6%
Office Clerks, General	26,800	23%	\$16.31	15%
Cooks	24,530	43%	\$13.17	27%
Customer Service Representatives	19,200	33%	\$16.59	14%
Personal Care Aides	18,390	37%	\$12.56	20%
Elementary and Middle School Teachers	18,300	16%	\$23.57	1%
Nursing Assistants	16,350	48%	\$14.03	14%
Waiters and Waitresses	14,960	59%	\$11.67	24%
Sales Representatives, Wholesale and Manufacturing	13,520	6%	\$29.54	15%
Secondary School Teachers	13,400	16%	\$25.58	4%
Teaching Assistants	13,090	44%	\$12.93	38%
Administrative Support Supervisors	12,950	8%	\$23.87	11%
First-Line Supervisors of Retail Sales Workers	10,790	24%	\$18.50	8%

Note: BLS = Bureau of Labor Statistics; ACS PUMS = American Community Survey Public Use Microdata Sample. Occupation titles and percent of workers below the ALICE Threshold come from ACS PUMS. ALICE Threshold status is determined by comparing workers' household income to the Household Survival Budget for their household composition and location. Employment and wage numbers are from BLS and are matched to the closest PUMS occupation title (which are generally broader than those in BLS).

Sources: ALICE Threshold, 2022; Bureau of Labor Statistics—Occupational Employment Statistics, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2019 and 2022

To see the most common occupations for workers below the ALICE Threshold in your community, visit [UnitedForALICE.org/ALICE-EVD](https://www.unitedforalice.org/ALICE-EVD). For more data on jobs by hourly wages and full-time, part-time, and hourly work schedules, visit [UnitedForALICE.org/Labor-Force/Arkansas](https://www.unitedforalice.org/Labor-Force/Arkansas).

# Financial Hardship Over Time

Despite some ups and downs in rates of financial hardship since the end of the Great Recession, the trend is clear: **The number of ALICE households in Arkansas has been steadily growing.** Between 2010 and 2022, the total number of households in the state increased by 7%, households in poverty decreased by 2%, and the number of ALICE households increased by 24%. By 2022, 16% (195,972) of all households were below the FPL, and 31% (366,907) of all households were ALICE – a combined 47% (562,879) of households struggling to make ends meet.

Zooming in to the period around the COVID-19 pandemic (2019–2022), there was surprisingly little change in the

rate of financial hardship in Arkansas (46% of households below the ALICE Threshold in 2019 and 47% in 2022). Yet by number, ALICE households continued to grow.

This consistent trend – a growing number of households that are struggling financially, often ineligible for public assistance, and undercounted by official measures – represents a major vulnerability in our economic system. It also suggests that overall social and economic policies are falling short in addressing the root causes of financial instability.

## Households by Income, Arkansas, 2010–2022

Note: The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and Poverty-Level households have been generally increasing, decreasing, or remaining flat. The ALICE and Poverty trend lines are both statistically significant (ALICE at  $p=0.0001$  and Poverty at  $p<0.05$ ).

Sources: ALICE Threshold, 2010–2022; U.S. Census Bureau, American Community Survey, 2010–2022

To see additional data on financial hardship over time in Arkansas, visit [UnitedForALICE.org/Arkansas](https://UnitedForALICE.org/Arkansas).

# SPOTLIGHT ON ALICE DEMOGRAPHICS

## Families With Children

While recent attention has focused on the rising [Supplemental Poverty Rate](#) for children following the expansion and reversal of Child Tax Credits during and after the pandemic, longer-term trends — specifically, the decline in total families with children and the rise in ALICE households — tell a more nuanced story.

The number of households with children in Arkansas has been declining (down 5% from 2010 to 2022). This trend has been driven by married-parent households, which fell in number from 213,596 in 2010 to 206,524 in 2022 (down 3%), and single-female-headed households, which fell from 92,211 in 2010 to 82,157 in 2022 (down 11%). At the

same time, the number of single-male-headed households increased, from 23,758 in 2010 to 25,859 in 2022 (up 9%).

While overall in Arkansas, the number of households with children in poverty has been declining over the past decade, the number of ALICE households with children has increased for both married-parent and single-parent families. By 2022, 40% of families with children in Arkansas were below the ALICE Threshold. And longstanding disparities in financial hardship by household type remained: 77% of single-female-headed families and 64% of single-male-headed families were below the ALICE Threshold in 2022, compared to 23% of married-parent families.

## Households With Children, Arkansas

	Married-Parent	Single-Female-Headed	Single-Male-Headed
<b>Percent Change 2010 to 2022</b>			
Total Households	▼ Decreased 3%	▼ Decreased 11%	▲ Increased 9%
Households in Poverty	▼ Decreased 24%	▼ Decreased 23%	▼ Decreased 18%
ALICE Households	▲ Increased 33%	Flat	▲ Increased 74%
<b>Percent Below ALICE Threshold, 2022</b>	<b>23%</b>	<b>77%</b>	<b>64%</b>

Note: Poverty rates for families with children differ from rates for individual children, in part due to different surveys and in part because there are often multiple children in a single household, which can accentuate swings.

Sources: ALICE Threshold, 2010–2022; U.S. Census Bureau, American Community Survey, 2010–2022

### THE COST OF CHILD CARE

Child care remains one of the highest Survival Budget costs for households with children, and the [child care system](#) is still feeling the impact of the COVID-19 pandemic. Provider shortages and lack of affordable care present fewer options for parents. According to the October 2023 Household Pulse Survey, when families in the West South Central Census Region (which includes Arkansas) were asked what they did when child care was closed, unavailable, or unaffordable, the most common responses for respondents below the ALICE Threshold were to cut work hours (30%), take unpaid leave (25%), or supervise one or more children while working (19%).

# Households Headed by People Age 65 and Over

With the [aging of the Baby Boomer generation](#), households headed by people age 65 and over are the fastest-growing age group in Arkansas (up 29% between 2010 and 2022). They are also the age group with the most substantial increase in the number of households below the ALICE Threshold (up 32% during the same period).

In 2022, 54% of Arkansas' 65+ households were below the ALICE Threshold (182,698). While Social Security helps [reduce the poverty rate for households headed by older adults](#) (14% in Arkansas in 2022), benefits have not been enough to help bring older adults to financial stability.

As a result, for more than a decade, a substantial number of these households have been ALICE (40% in 2022). In 2022, monthly costs for the ALICE 65+ Survival Budget for one adult in Arkansas were \$778 more than the [average Social Security payment](#) and \$1,272 more than the FPL.

With increasing costs and insufficient retirement savings, many older adults have needed to continue working. In 2022, more than 180,000 people age 65 and over living below the ALICE Threshold in Arkansas did not have retirement savings beyond Social Security, and nearly 19,200 were working.

## Monthly ALICE 65+ Survival Budget Total, Average Monthly Social Security Payments, and the Federal Poverty Level, Arkansas, 2022

Note: See page 13 for a breakdown of monthly ALICE 65+ Survival Budget costs.

Sources: ALICE 65+ Survival Budget, 2022 (see the ALICE [Methodology](#) for details); Social Security Administration, 2022

# Black, Hispanic, and Indigenous Households

Rates of financial hardship differ substantially by race/ethnicity in Arkansas due to [persistent systemic racism](#), [discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability. In 2022, 64% of Black, 59% of Native Hawaiian/Pacific Islander, 52% of American Indian/Alaska Native, and 51% of Hispanic households, as well as 50% of households headed by someone of Two or More Races, were below the ALICE Threshold in Arkansas, compared to 43% of White and 33% of Asian households.

These disparities are mirrored in the workforce. For example, Black and Hispanic workers were more likely than White workers to experience [disruption in employment](#) during the pandemic. And gaps in employment persisted, with 12% of Black Arkansans below the ALICE Threshold not currently working, but looking for work in 2022 – higher than the rate for all Arkansans below the Threshold (10%) and much higher than for Arkansans above the Threshold (3%).

# Household Financial Status and Key Demographics, Arkansas, 2022

	Total	Below ALICE Threshold	<span style="color: #004a80;">■</span> Poverty <span style="color: #4f81bd;">■</span> ALICE <span style="color: #f4a460;">■</span> Above ALICE Threshold		
<b>ALL HOUSEHOLDS</b>	1,201,499	562,879	16%	31%	53%

<b>HOUSEHOLD TYPE</b>					
Married With Children	206,524	47,631	9%	14%	77%
Single-Female- Headed With Children	82,157	62,930	48%	28%	23%
Single-Male-Headed With Children	25,859	16,620	23%	41%	36%
Single or Cohabiting, Under 65, no Children	549,197	253,000	15%	31%	54%
<b>RURAL/URBAN</b>					
Rural	404,541	208,587	19%	33%	48%
Urban	796,958	354,292	15%	29%	56%

Note: The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Update, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Counties are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Counties with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2022; American Community Survey, 2022

# ALICE REMAINS IN THE CROSSCURRENTS

Many ALICE households face [ongoing distress](#) because they have not recovered from the Great Recession, debt accumulation, a job loss, or other major challenges. Many are working hard and still struggling to find safe housing, quality child care, nutritious food, accessible health care, and reliable transportation that they can afford. Rising wages and pandemic assistance mitigated some of the financial impact of business disruptions, a health crisis, and rising inflation that characterized the past few years. Yet 47% of households in Arkansas were still struggling in 2022 – [ranking](#) Arkansas 47<sup>th</sup> among all states and the District of Columbia in financial hardship (with 1<sup>st</sup> representing the lowest rate of hardship). Insights from the Federal Reserve SHED and the Household Pulse Survey help explain why:

## Inflation is Hitting ALICE Harder

- **The cost of basics** is increasing faster than the overall rate of inflation, as reported by the [ALICE Essentials Index](#). And it has gotten harder for ALICE to keep up with bills than at the height of the pandemic. According to the Household Pulse Survey, 60% of households below the ALICE Threshold in Arkansas reported that it was somewhat or very difficult to pay for usual items such as food, rent or mortgage, car payments, and medical expenses in October 2023, up from 45% in August 2020.
- **Housing costs** are on the rise in many parts of the state, and the impact is greater for those who were already struggling financially. According to the SHED, in 2022, 36% of households below the ALICE Threshold and 30% of households above the Threshold in the [West South Central Census Region](#) reported that their rent or mortgage had increased in the prior 12 months.

## Changes in Public Assistance Impact ALICE

- **Food assistance:** Increased need for food assistance was a hallmark of the pandemic. Food pantries experienced a substantial increase in [demand for services](#), and Supplemental Nutrition Assistance Program (SNAP) [eligibility criteria broadened and monthly payments increased](#) (through February 2023). In 2022, the need remained high, with one in six Americans (49 million) [receiving private charitable food assistance](#) – down from the height of the pandemic, but still up markedly from 40 million in 2019. In part due to the SNAP income eligibility level in Arkansas (130% of the FPL), public food assistance was not accessible to all households that were struggling financially: Only 34% of all Arkansas households in poverty and 11% of all ALICE households participated in SNAP in 2022.
- **Rent:** With rising costs, the expiration of [pandemic rental assistance](#), and the end of both [state](#) and [federal eviction bans](#) many Arkansans [continued to struggle to pay their rent](#). According to the Household Pulse Survey, 16% of renter households below the ALICE Threshold in Arkansas were behind on rent payments in October 2023, down from 20% in August 2020. In Arkansas in 2022, 58% of households below the ALICE Threshold were rent burdened (paying more than 30% of their income on rent) and 33% were severely rent burdened (paying more than 50% of income on rent).

# ALICE is Less Prepared for Crises and Retirement

- **ALICE struggles to save:** According to the SHED, 49% of respondents in the [West South Central Census Region](#) had emergency savings in 2022. Yet only 32% of households below the ALICE Threshold had these rainy day funds that would cover their expenses for three months in the event of sickness, job loss, economic downturn, or another emergency, up slightly from 30% in 2019.
- **ALICE faces unexpected medical expenses:** According to the SHED, 23% of respondents below the ALICE Threshold in the [West South Central Census Region](#) incurred an unexpected major medical expense that they had to pay for out of pocket because it was not completely paid for by insurance in 2022, similar to 24% in 2021. Medical debt generally reflects [poorer health](#) and lower rates of health care coverage, and can lead to [lower credit scores](#) and [additional financial hardship](#). Additionally, the [consequences of medical debt](#) are not experienced equally; those with lower incomes and people of color are more likely than their counterparts to be contacted by collection agencies and denied future care.
- **Financial hardship impedes retirement savings:** According to the SHED, in 2022, 19% of all non-retired adults and 31% of non-retired adults above the ALICE

Threshold in the [West South Central Census Region](#) reported that their retirement savings plan was currently on track. Yet only 9% of those below the Threshold reported the same.

- **Financial hardship takes a toll on mental health:** The negative impact of financial stress on mental health has been [well established](#). According to the Household Pulse Survey, 23% of respondents below the ALICE Threshold in Arkansas reported feeling nervous, anxious, or on edge nearly every day over the prior two weeks in October 2023 – similar to August 2020 (24%), and almost double the rate for those above the Threshold (12% in 2023).

This research shows a clear trend in our communities and our economy: Financial hardship is widespread, and it's not going away. The current system is not working for ALICE. The narrative in this Update helps make the case for innovative, cross-sector change in Arkansas and across the U.S. The data, tools, and resources on the [United For ALICE](#) website can equip business, government, education, and nonprofit leaders to make data-informed decisions that address the root causes of financial hardship. Collaborative effort at all levels – local, state, and federal – will be needed to change the trajectory for ALICE households.

# ALICE RESEARCH & METHODOLOGY

The ALICE Household Survival Budget calculates the cost of household essentials for each county in Arkansas and relies on a wide range of public data sources, listed below. For household income, the ALICE measures rely on the U.S. Census Bureau’s American Community Survey (ACS) – both household tabulated data and individual data from the Public Use Microdata Sample (PUMS) records. Household costs are compared to household income to determine if households are below the ALICE Threshold. The latest [ALICE Methodology](#) review was completed in the summer of 2023. Methodology enhancements include:

- **Child care:** Starting in 2022, the Arkansas Department of Education has shifted from market rate surveys to using a [cost estimation model](#) for child care costs.
- **Health care costs:** A “poor health multiplier” is used to capture the additional costs lower-income households incur for being in poor or fair health. Based on the latest research, out-of-pocket costs in the health care line item

are increased by 19% (a more conservative estimate than the 30% used in prior years).

- **Broadband added:** As the majority of Americans now [have home broadband](#), basic broadband internet has been added to technology costs. The smartphone plan has been updated to include an unlimited (albeit less expensive than the previous 10GB version) smartphone plan for each adult in the household.
- **Determining ALICE status:** For 2021 data and years prior, the ALICE Threshold was rounded by budget total to the nearest ACS income bracket (e.g., Threshold of \$32,500 corresponded to bracket \$30,000–\$34,999; all households in that bracket were below the ALICE Threshold). Starting this year (2022 data), the Threshold is calculated in proportion to where it falls within the bracket (e.g., if Threshold is \$32,500, half of households in the bracket are below the Threshold).

ALICE Household Survival Budget, Arkansas, 2022			
	Single Adult (Age 18–64)	Single Adult (Age 65+)	2 Adults, 1 Infant, 1 Preschooler
<b>Monthly Costs</b>			
Housing – Rent	\$378	\$378	\$408
Housing – Utilities	\$163	\$163	\$310
Child Care	-	-	\$1,146
Food	\$416	\$384	\$1,132
Transportation	\$411	\$347	\$1,062
Health Care	\$175	\$530	\$677
Technology	\$86	\$86	\$116
Miscellaneous	\$163	\$189	\$485
Tax Before Credits	\$288	\$358	\$1,038
<b>Monthly Total</b>	<b>\$2,080</b>	<b>\$2,435</b>	<b>\$6,374</b>
<b>ANNUAL TOTAL Before Tax Credits</b>	<b>\$24,960</b>	<b>\$29,220</b>	<b>\$76,488</b>
Tax Credits (CTC and CDCTC)	\$0	\$0	(\$5,436)
<b>ANNUAL TOTAL With Tax Credits</b>	<b>\$24,960</b>	<b>\$29,220</b>	<b>\$71,052</b>
<b>Full-Time Hourly Wage</b>	<b>\$12.48</b>	<b>\$14.61</b>	<b>\$35.53</b>

*Note: CTC = Child Tax Credit, CDCTC = Child and Dependent Care Tax Credit. Full-time hourly wage represents the wage needed at 40 hours per week to support the annual total, with credits. For the family of four, this represents the combined wage needed for two workers. Many households incur higher costs, especially for housing, as units may not be available at Fair Market Rent.*

**Data Notes:** The income data used in this Update rely on ACS estimates. The ACS is based on a representative sample, rather than all housing units and people; therefore, these estimates have a [degree of uncertainty](#). Some data points are geographic averages, others are one- or five-year averages depending on population size (see the [Data Sheet](#) for details). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. ALICE analysis does not include people who are unhoused or living in group quarters.

# ABOUT UNITED FOR ALICE AND OUR PARTNERS

*ALICE in the Crosscurrents: An Update on Financial Hardship in Arkansas* is brought to you by the [Winthrop Rockefeller Foundation](#) in partnership with [United For ALICE](#), a driver of innovative research and action around financial hardship for ALICE households. With a commitment to [racial and economic justice](#), United For ALICE and the Winthrop Rockefeller Foundation share this work with other foundations, nonprofits, government, and corporations to inform policy and promote positive change for ALICE households. The grassroots ALICE movement, developed by United Way of Northern New Jersey, has spread to 31 states and the District of Columbia. Learn more about the ALICE movement [here](#).

To create the ALICE Reports, our [team of researchers](#) works with [Research Advisory Committees](#) composed of experts from our partner states. This work is guided by our rigorous [methodology](#), which is updated biennially with experts from across our Research Advisory Committees.

United For ALICE partners with the Winthrop Rockefeller Foundation to bring this research to Arkansas, and this work is also sponsored by Arkansas Blue Cross and Blue Shield, Baptist Health of Arkansas, Delta Dental of Arkansas Foundation, Entergy, and Heart of Arkansas United Way.
